## Transit Operators Financial Transactions Report Instructions

### Introduction:

The purpose of the Transit Operators (TO) Financial Transactions Report (FTR) to the California State Controller's Office (SCO) is to provide financial and statistical data about the operations of public transit services provided by transit operators throughout California. The data compiled from this financial report are published on the SCO website at <https://bythenumbers.sco.ca.gov/> for use by the California State Legislature, transportation planners, and the public.

**Note:** The 2020-21 State Transit Assistance (STA) Program Revenue Basis (Public Utilities Code 99314) form will be used by SCO only to determine each STA eligible operator's revenue basis portion of the 2020-21 STA allocation, pursuant to Public Utilities Code (PUC) section 99314. This data comes from the Statement of Revenues, Expenses, and Changes in Fund Net Position of the 2018-19 Transit Operators Financial Transactions Report. This information will not be published to <https://bythenumbers.sco.ca.gov/>.

## Transit Operators Financial Transactions Report Instructions

### Filing Instructions:

General reporting instructions, electronic report format instructions, and applicable California laws related to the reporting requirements for preparing the TO FTR are available on the SCO website at <https://www.sco.ca.gov>.

### Who Must File:

All transit operators (a city, county, or special district) who operate or contract for operations of a general purpose transit system or specialized service transit system are required under PUC section 99243 to file a report of financial transactions with SCO.

### What to File:

The following items must be submitted:

- **TO FTR** (including signed Cover Page form)
- **U.S. Bureau of the Census Survey**
- **2020-21 State Transit Assistance (STA) Program Revenue Basis (Public Utilities Code 99314) form**

Although the TO FTR must be submitted either in an electronic format online or by mail, the signed **Cover Page** form, the signed 2020-21 State Transit Assistance (STA) Program Revenue Basis (Public Utilities Code 99314) form, and the U.S. Bureau of the Census Survey must be mailed in paper form to complete the filing requirements.

### Audit Reports:

PUC section 99243 requires that the data used for the FTR come from audited financial statements, if available. Although the inclusion of an audit report is not an FTR legal requirement, SCO would greatly appreciate if an audit report is sent as soon as one is available.

### When to File:

PUC section 99243 requires that FTRs be filed seven months after the close of the transit operator's fiscal year. There is no statutory authority to grant extensions for filing this report. All reports submitted by the deadline are final. SCO will only accept revised FTRs if SCO has requested the revision after review.

Blended CUs, although legally separate entities, are in substance part of the agency’s operations. Therefore, data from blended CUs are integrated into the appropriate agency funds for reporting purposes.

#### Discretely Presented Component Unit

Discretely presented CUs are legally separate from the agency and usually provide services to entities and individuals outside the agency.

Report payments for the use of capital assets not owned by the transit operator. If part of the lease cost covers a service, rather than just the cost of the use of the asset, the agency reports this expense under **Services (Account No. 5020)** rather than under Operating Lease Expenses.

##### Capital Leases (Account No. 5230)

Report payments for the current portion of capital leases, including lease payments for capital leases during the reporting period. A lease is considered a capital lease if it meets any of the following four criteria at its inception (the earlier of the date of the lease agreement or commitment):

## Transit Operators Financial Transactions Report Instructions

### Statement of Revenues, Expenses, and Change in Fund Net Position Form (continued):

1. **Transfer of ownership:** the lease transfers ownership (e.g., transfer of title) of the property to the transit agency by the end of the agreed-upon lease term.
2. **Bargain purchase option:** the lease contains a provision that allows the transit operator to purchase the leased property for a reduced price (reduced compared to expected fair value of the property at the date that the purchase option becomes exercisable).
3. **Lease term:** lease term is equal to or greater than 75% of the estimated useful life of the leased property. However, if the beginning of the lease term falls within the last 25% of the total estimated useful life of the leased property, this criterion cannot be used for classifying the lease as a capital lease.
4. **Minimum lease payments:** the present value at the beginning of the lease term of the minimum lease payments to be paid by the transit agency, excluding executory costs such as insurance, maintenance, and taxes, is equal to or greater than 90% of the fair value of the property at lease inception.

If part of the lease cost covers a service, rather than just the cost of the use of the asset, the agency reports this expense under **Services (Account No. 5020)** rather than under Capital Leases.

#### **Related Parties Lease Agreements (Account No. 5240)**

Report leases with terms and payment amounts that are substantially less than they would be in usual circumstances because the transit agency is related to the lessor. Examples include:

- A state government's department of transportation purchases buses and leases them to transit operators in the state at half the market rate.
- A county government leases land to a local transit agency for use as a parking lot for a dollar a year.

If part of the lease cost covers a service, rather than just the cost of the use of the asset, the agency reports this expense under **Services (Account No. 5020)** rather than under Related Parties Lease Agreements.

#### **Voluntary Nonexchange Transactions (Account No. 5250)**

Report the value provided of nonexchange transactions when all applicable eligibility requirements have been met. An example is when one transit operator builds capital assets, such as railways and train stations, and transfers the assets to another transit agency that operates them.

Recognize this difference as a component of interest expense in a systematic and rational manner over the remaining life of the old debt or the life of the new debt, whichever is shorter. "Reacquisition price" is the amount required to repay previously issued debt in a refunding transaction. "Net carrying amount" is the amount due at maturity, adjusted for any unamortized premium or discount related to the old debt, as well as any deferred outflow/inflow of resources associated with a derivative instrument used as an effective hedge of the old debt.

Include deferred outflows of resources and deferred inflows of resources that are attributable to the acquisition, construction, or improvement of those assets or related debt. Do not include significant related debt proceeds or deferred inflows of resources unspent at the end of the reporting period. Instead, include the related debt or deferred inflows of resources in the same net position component (restricted or unrestricted) as the unspent amount.

#### Restricted

Report restricted assets reduced by liabilities and deferred inflows of resources related to those assets. *Restricted assets* are assets the use of which is subject to constraints that are either 1) externally imposed by creditors (debt covenants), grantors, contributors, or laws or regulations of other governments or 2) imposed by law through constitutional provisions or enabling legislation. Generally, a liability relates to restricted assets if the asset results from a resource flow that also results in the recognition of a liability or if the liability will be liquidated with the restricted assets reported.

### **2020-21 State Transit Assistance (STA) Program Revenue Basis (Public Utilities Code 99314) Form:**

The purpose of this form is to report the 2020-21 transit operator's qualifying revenues and operating expenses pursuant to Public Utilities Code (PUC) section 99314. The majority of data will automatically carry forward from the 2018-19 Statement of Revenues, Expenses, and Change in Fund Net Position form.

This form, together with the annual State Transit Assistance (STA) program eligibility certification submitted to SCO by each transportation planning agency, county transportation commission, and the San Diego Metropolitan Transit Development Board, will be used by SCO to determine each STA-eligible operator's revenue basis portion of the 2020-21 STA allocation.

#### **Specific Instructions:**

All transit operators must complete this form. This form must be signed by both the State Transit Assistance Program Manager and the CFO/Finance Director, and must be submitted in paper form to SCO to complete filing requirements for State Transit Assistance (STA) Program.

Failure to submit the 2020-21 State Transit Assistance (STA) Program Revenue Basis form may affect the State Transit Assistance allocations, if you are eligible to receive them.

Specifically, this form is to be filed seven months after the close of the transit operator's fiscal year. There is no statutory authority to grant extensions for this filing. All reports submitted by the deadline are final. SCO will only accept revised FTRs if SCO has requested the revision after review.
